## EXPERIENCE

### Meta Hosting - Front End Developer

Worked integrating the backend servers and analytics to the frontend user page. Using various company provided APIs and algorithms.

### Pixie's Media, California (Remote) — Web Engineer

Worked as a full time frontend and backend developer and offered to build The entire web-app for them and maintaining it for a year.

### Freelancer (Majority)

MONTH 2020 - PRESENT

Most of the time, I focus on freelancing as there is a wider scope of learning and greater number of jobs to select.

## EDUCATION

### Foundation Academy, IIT PATNA — High School Graduate

### UpGrad, Online — BS in Computer Science

## PROJECTS

### Suzume AI — Chat GPT with Human Feelings

A framework for Chat Bots (OpenSourced) which when used can give human feelings/behavior in the way a Chat Bot powered with AI talks. Fully Customizable.

### TweetForTweet — A Social M. App to promote twitter posts.

A Web Application like instagram but where people can promote their twitter posts using various twitter API's.

### Family Tree — A Web App to connect people inside a Family.

Using React, JS, Express.js and Firebase I created a web application with an easy UI. User's can send memories, messages and announcements.
